

1 Unpack and Connect

Scan me -- Installation Tutorial video

* 35 mm IT-8 Target (Only for OF8200i Ai)

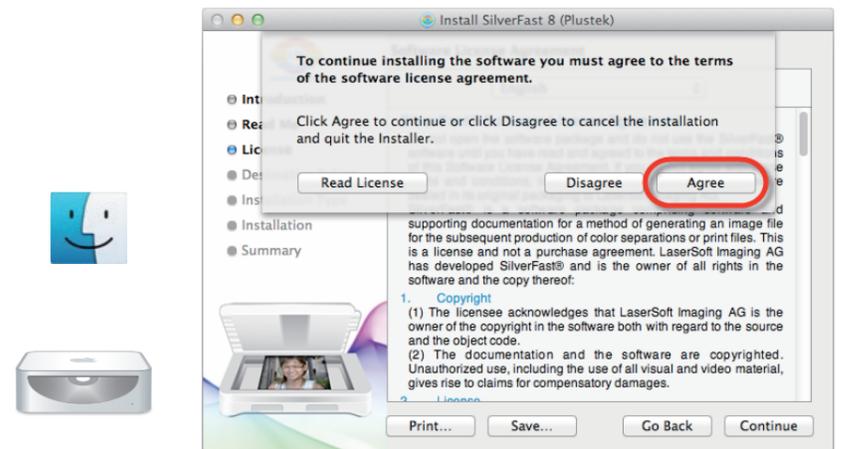

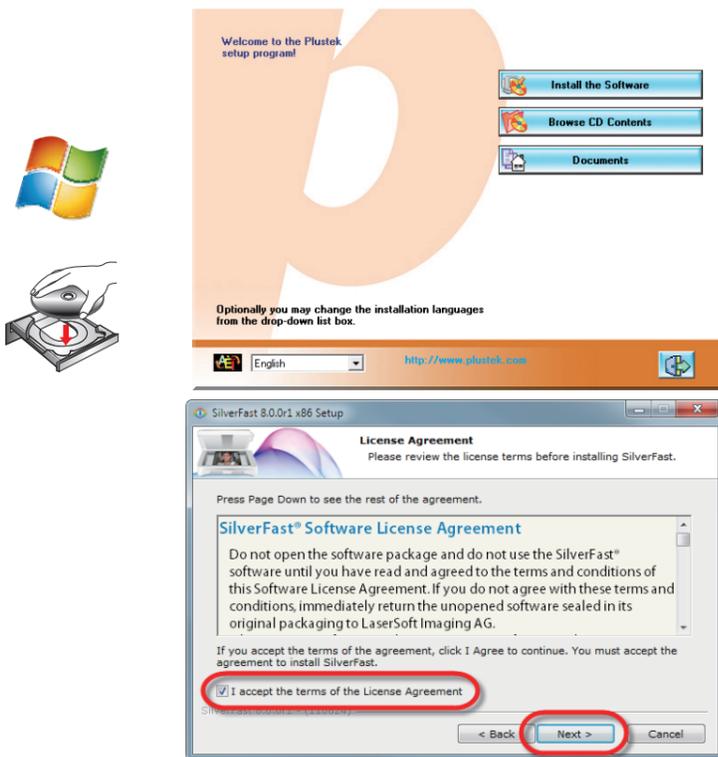

Place Film in the Holder

If you are installing the software without a CD/DVD drive, please refer to For Mac/PC without a CD/DVD drive section on the rear side of this guide.

2 Install Software

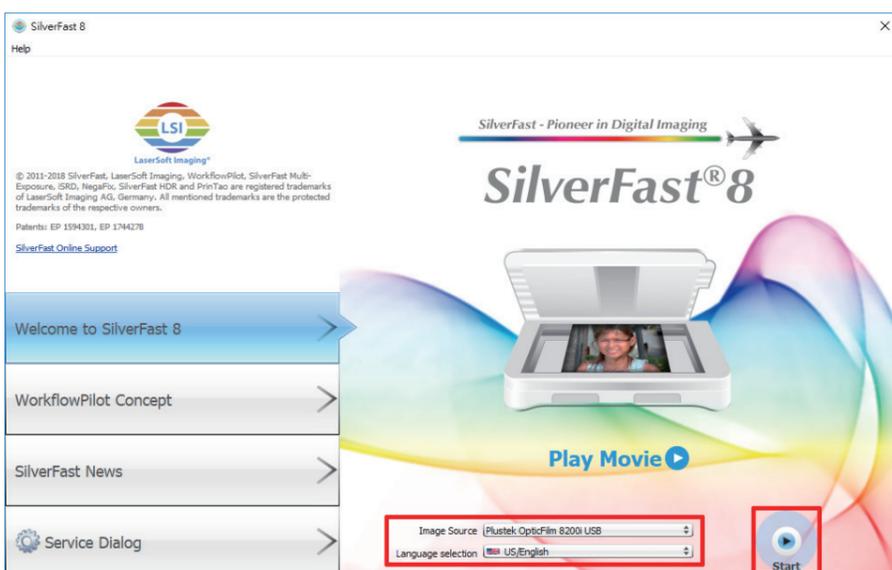

Insert the product CD and run your product's software package.

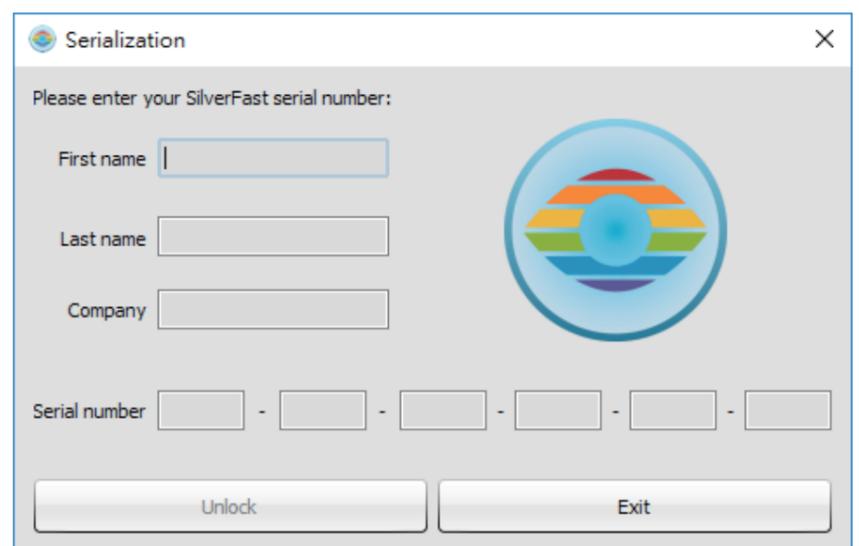

* You do not have to install any scanner drivers when installing the scanner under Mac OS. The scanner drivers are already included within the SilverFast installation.

3 Unlock SilverFast

1. Check Image Source and Language Selection, then click Start.

2. Enter your First name, Last name, and the Serial number, then click Unlock.

* The SilverFast DVD-ROM should remain in the DVD-ROM drive for the Unlock process.

Attention If the Image Source is blank, please check if your scanner is properly listed under [Imaging Devices] in [Device Manager].

The SilverFast serial number is located on the front of the SilverFast DVD-ROM case.

For Mac/ PC without a CD/DVD drive

SilverFast serial number exchange

To enable you to use SilverFast without a CD/DVD drive please enter your [registered](#) serial number and e-mail address below.

The following steps will exchange your current serial number for a new one.
Your current serial will be invalidated.

You will be able to use the new serial to download SilverFast from our website, install and serialize it without a CD.
A download link will be included in our e-mail.

SilverFast serial number: [Where do I find my serial number?](#)

Email address:

Please click only once. It may take a moment until the data is submitted.

Step 4

Exchange SilverFast serial number

FAQ

1. Why can't I start the SilverFast software?
Check if the **Image Source** is blank, if it is blank:
 - a. Make sure the USB cable and power cord are connected properly.
 - b. Check if your scanner is properly listed under [Imaging Devices] in [Device Manager].
2. How to do the SilverFast software reset?
 - a. Click [Service Dialog] in the SilverFast welcome screen.
 - b. Select [Software reset] resets this software to the factory settings. (All saved settings will be lost as well.)
3. Is the iSRD function not available on B/W film?
iSRD can be used with conventional colour negatives (developed using the C41 process), colour slides (developed using the E6 process) and paper proofs. Due to the silver content in conventional black and white negatives and slides, these can't be retouched using iSRD.
